

OTR 79-5069

5 NOV 1979

MEMORANDUM FOR: Communications Requirements Coordinator, STAT  
DDA

FROM:   
Chief, OTR Services Staff

SUBJECT: New Communications Support Requirements,  
FY 1982 - FY 1986

REFERENCE: Memorandum for DTR from A/DDA, dated  
28 September 1979, Same Subject

1. The following OTR requirements, listed in priority order, respond to paragraph 1b of the referenced memorandum.

Additional lines for:

CAMS Training	4	2400 baud lines
To VM for ODP Training	8	2400 baud lines
VM and GIMS use for personnel in CofC	8	2400 baud lines
SAFE Training	10	2400 baud lines
COINS Training	10	9600 baud lines

2. The requirements for computer training support continue to grow. The Office of Data Processing (ODP) Training Branch will probably move to the C of C Building. Requirements for SAFE, CAMS, and COINS training are expected to grow considerably over the next five years.

3. Branches within the Office of Training (OTR) are making greater use of the Data Access Center terminals, and it is expected that sufficient interest will be shown in VM/GIMS terminals for several additional ones to be installed. In this regard, OTR also foresees a likely need to enhance the capability of our Transcription and Processing unit by establishing a link with our Data Access Center.

MORI/CDF

SUBJECT: New Communications Support Requirements  
FY 1982 - FY 1986

STAT

4. If the SAFE computer is on the same COMTEN as our classroom VM terminals, there will not be the need for any new SAFE lines. If these lines are not provided, OTR will not be able to offer the associated training at the desired levels.

STAT

5. [redacted] is the point of reference in the ISC for more detailed response to these requirements.
